REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art, Martin et al. (WO 89/11514), teaches a hot-melt adhesive composition comprising a silane functional ethylene copolymer admixed with non-reactive binders such as poly- α -olefins. However, there is no teaching or suggestion in Martin et al. to substitute the silane functional ethylene copolymer with silane functional poly-isobutylene or silane functional hydrogenated polybutadiene, as in the present claims. None of the prior art was found to teach or sufficiently suggest the hot melt adhesive of the present claim 14, nor the process of using or the multiple glazing system prepared from said hot melt adhesive

Thus, claims 14-28 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
